

# INTRODUCING MEMBER ATTRIBUTES FOR IPSOS COMMUNITIES

For "In the Moment" Consumer Segment Understanding

**Member Attributes** is an exciting new community feature enabling clients to view individual members' demographic information and past survey feedback directly from front-end profile pages and qualitative activities within the community.

Click on any member profile to see a list of attributes mapped to individual participants, including gender, age, income, product preferences or any other data points gathered during the qualification screener or in previous community surveys. What you choose to see is fully customizable and can be re-configured or updated at any time, providing you with the ability to view the information that matters most to you.

### MEMBER ATTRIBUTES

**Gender:** Male  
**Age:** 18-34  
**Ethnicity:** Caucasian  
**HH Income:** \$100,000 - \$109,999  
**HH Size:** Four  
**Children Age:** 6 to 12 years old: Two  
**Marital:** Married

Attributes are also viewable from within discussions, blogs, ideation and voting activities, allowing you to view critical information side-by-side with the feedback at hand. This feature provides for enhanced, “in the moment” contextual understanding of key consumer segments, and includes the option to choose additional attributes to display on a per activity basis, as well as an option to filter responses based on the variables of your choice.

I love the new shopping aisle! Finding my favorite brands is so much easier now with the large, bright signs and expanded shelf space. It's my new favorite section of the store!
